

UVTON Announces Deep UV LEDs Sales

[PRESS RELEASES](#)

Columbia, South Carolina., September 9, 2022.

UVTON, Inc. today announced sales of Deep Ultraviolet Light Emitting Diodes (DUV LEDs) with peak emission wavelength shorter than 365nm. The Company signed an Agreement with the pioneer of this technology and world's leading supplier of DUV LEDs, a Columbia-based Sensor Electronic Technology, Inc. (SETi). SETi is a subsidiary of Seoul Viosys Co., Ltd. (KOSDAQ: 092190.KQ). Under the terms of the Agreement UVTON, Inc. is granted an exclusive rights as a supplier of TO-packaged DUV LEDs in the United States.

"This is the first step in expanding UVTON business opportunities in DUV LED device and solutions markets", said President and CEO of UVTON, Inc. and a co-founder and former long-time President and CEO of SETi. "We will provide our customers with extensive technical support by experienced DUV LEDs sales team and are planning to provide devices and customized solutions for systems developers and integrators".

About UVTON:
